Joseph Rockwood

Software Engineer — Full-stack .NET, SQL, APIs & Reporting

Battle Creek, MI · Open to relocation · joeyrockwood.fyi · linkedin.com/in/joseph-rockwood · github.com/josfire18

SUMMARY

Full-stack software engineer who builds .NET applications, SQL-driven reporting, and APIs, turning slow, manual business processes into fast, reliable, automated systems. Experience across insurance, sales, and manufacturing, including regulated, compliance-driven environments: handling sensitive data, implementing access controls, and building the audit and compliance reporting that supports formal audits.

EXPERIENCE

Software Programmer · ManhattanLife · Remote — Dec 2022 – Present

- Design and build SQL Server solutions end to end — queries, views, stored procedures, and SSRS reporting — plus the APIs that surface the data.
- Develop, modify, and test application code, forms, and scripts; troubleshoot system bugs and issues.
- Partner with Operations to define reporting requirements and maintain technical specification docs.
- Build and maintain enhancements to an internal voluntary benefits business application, including analysis and resolution of system issues.

Systems Developer · DMA Sales, LLC · Loris, South Carolina — Sep 2021 – Oct 2022

- Full-stack development of custom .NET applications used in production to automate and optimize operations.
- Maintained the company's SQL Server databases in T-SQL — queries, views, stored procedures, and scheduled jobs.
- Generated user-requested reports with SSIS, SSRS, and Crystal Reports.
- Supported users and scoped new application/report requests through a ticketing system.

IT Programmer · MORryde · Elkhart, Indiana — Jun 2018 – Aug 2021

- Full-stack development of custom .NET apps to automate, optimize, and increase company efficiency.
- Maintained extensive SQL Server databases in T-SQL — queries, views, stored procedures, and jobs.
- Produced reports and visualizations via SSIS / SSRS / Crystal Reports and Tableau.
- Wrote VBScript macros to interact with the Infor Visual ERP; supported users via Spiceworks and Jira.

Web Programming Intern · Trine University · Angola, Indiana — Jan 2018 – Jun 2018

- Built and updated web applications to enhance university business processes.
- Created dynamic, automated forms on Trine's portal (ExFlow + T-SQL) to reduce manual work for end users.
- Coordinated requirements directly with departments and schools across the university.

IT Technician · Trine University · Angola, Indiana — May 2017 – Dec 2017

- Resolved help-desk requests with courteous, timely, effective support.
- Troubleshot and diagnosed Windows and Mac systems; installed and tested hardware and software.
- Managed faculty, staff, and student accounts in Active Directory.

SKILLS

Languages & .NET: C#, .NET, VB / VBScript, C / C++, Java, Python, JavaScript, PowerShell, SQL, T-SQL, PL/SQL

Web & APIs: HTML5, CSS, MVC, REST APIs, JSON, XML, UI and application development

Data & Databases: MS SQL Server, MySQL, SSMS, SSIS, SSRS, Crystal Reports, ETL, Tableau, database design

Practice & DevOps: Agile, SDLC, CI/CD, Git / GitHub, TDD, Jira, Visual Studio, requirements gathering

Security & Compliance: Regulated-industry experience, sensitive data handling, access controls, audit and compliance reporting, supporting audits

EDUCATION

B.S. in Informatics, Minor in Software Engineering — May 2018

Trine University · Angola, Indiana · GPA 3.5

Coursework: Data Mining, Algorithm Design & Analysis, Database Management & Advanced Database, Software Engineering, Software Analysis & Design, Network Management & Security, Digital Forensics I & II, Operations Research, Discrete Mathematics.
